- Full-time available
- Preferably Part-time
- In-Office work.
- Preferably remote work.

Profile

Front-End Web Developer. I have experience in projects using JavaScript, Vue.js, React.js, Remix, SASS, Tailwind, Supabase as BaaS and always applying responsive design.

My passion is everything related to web development and applications that meet real needs. I stand out for my ability to identify and seek optimal solutions to problems, as well as my adaptation to the workflow in a team.

I am a Higher Technician in Programming, and I am currently pursuing a bachelor's degree in Computer Science while seeking formal employment that allows me to acquire practical experiences and knowledge of the professional world.

Experience

2022 - present

Freelance

- Web application for efficient management of real state assets (Remix, Tailwind, Supabase) (under development).
<https://github.com/JulianManera8/rent-application>
